

**Project Name:**

**US Forest Service IDIQ**

**Authorizing Agency:**

US Forest Service– Andrew Pickens Ranger District

**Approximate Acreage:**

105 Acres

This IDIQ Contract will continue for a couple more years. To date, IPC has treated approximately 104.6 Acres of privet & autumn olive in food plots and forest on plot perimeters. Food plots will be partially converted to warm season grasses. We are currently in the second year of this contract. The contracting agent has the authority to call us at anytime to price a project for on the ground control. The primary methods used on this site have been cutting and treating and foliar applications.

**Invasive Pest Plants Controlled for US Forest Service Southeast Region**
